1. Testing Laboratory in Praha (0100)

Tests:

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.2	Concrete, admixtures and fibres for concrete		
1.2.1*	Determination of consistency by slump test	ČSN EN 12350-2	Fresh concrete
1.2.2*	Determination of consistency by VeBe test	ČSN EN 12350-3	Fresh concrete
1.2.3*	Determination of consistency by flow table test	ČSN EN 12350-5	Fresh concrete
1.2.4*	Determination of mass per unit volume	ČSN EN 12350-6	Fresh concrete
1.2.5*	Determination of air content - pressure methods	ČSN EN 12350-7, p. 6	Fresh concrete
1.2.6	Determination of resistance to frost	ČSN 73 1322	Hardened concrete
1.2.7	Determination of resistance to water and chemical de-icing agents	ČSN 73 1326, method A, C	Hardened concrete
1.2.8*	Determination of the shape and dimensions of specimens	ČSN EN 12390-1	Hardened concrete
1.2.9*	Determination of compressive strength, including the manufacture and treatment of test specimens	ČSN EN 12390-2 ČSN EN 12390-3 ČSN EN 12504-1, excl. cl. 6	Hardened concrete
1.2.10	Determination of compressive strength of test specimens	ČSN EN 12390-3	Hardened concrete
1.2.11	Determination of flexural strength of test specimens	ČSN EN 12390-5	Hardened concrete

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.
Central Laboratory
Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.2.12	Determination of the indirect tensile strength of test specimens	ČSN EN 12390-6	Hardened concrete
1.2.13	Determination of mass per unit volume	ČSN EN 12390-7	Hardened concrete
1.2.14	Determination of depth of penetration of water under pressure	ČSN EN 12390-8	Hardened concrete
1.2.15*	Determination of compressive strength	ČSN EN 12504-1 except p. 6	Hardened concrete
1.2.16*	Determination of rebound number by hardness drop tester	ČSN EN 12504-2	Hardened concrete
1.2.17*	Test of compressive strength by hardness testing methods (Schmidt N. L.)	ČSN 73 1373	Hardened concrete
1.2.18	Determination of setting time	ČSN EN 480-2	Concrete and mortar additives
1.2.19	Determination of bleeding of water from concrete	ČSN EN 480-4	Concrete and mortar additives
1.2.20	Determination of capillary absorption	ČSN EN 480-5	Concrete and mortar additives
1.2.21	Determination of solids content	ČSN EN 480-8	Concrete and mortar additives
1.2.22	Determination of air void characteristics in hardened concrete	ČSN EN 480-11	Concrete and mortar additives
1.2.23	Determination of flexural tensile strength - limit of proportionality, residual strength	ČSN EN 14651+A1	Metallic fibre-reinforced concrete
1.2.24	Determination of dry bulk density	ČSN EN 678	Autoclaved concrete
1.2.25	Determination of compression strength, flexural strength and concentric compressive strength	ČSN EN 679	Aerated concrete
1.3	Small concrete products		
1.3.1*	Determination of dimensions	ČSN EN 1338, Annex C	Concrete products
1.3.2*	Determination of dimensions	ČSN EN 1339, Annex C	Concrete products
1.3.3*	Determination of dimensions	ČSN EN 1340, Annex C	Concrete products

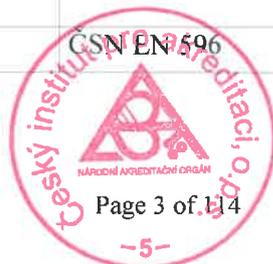

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Central Laboratory
Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.3.4	Determination of total water absorption	ČSN EN 1338, Annex E	Concrete products
1.3.5	Determination of total water absorption	ČSN EN 1339, Annex E	Concrete products
1.3.6	Determination of total water absorption	ČSN EN 1340, Annex E	Concrete products
1.3.7	Determination of the indirect tensile strength	ČSN EN 1338, Annex F	Concrete products
1.3.8	Determination of flexural strength and fracture load	ČSN EN 1339, Annex F	Concrete products
1.3.9	Determination of bending strength	ČSN EN 1340, Annex F	Concrete products
1.3.10	Determination of abrasiveness – Böhme	ČSN EN 1338, annex H	Concrete products
1.3.11	Determination of resistance to freezing/thawing	ČSN EN 1338, Annex D	Concrete products
1.3.12	Determination of resistance to freezing/thawing	ČSN EN 1339, Annex D	Concrete products
1.3.13	Determination of resistance to freezing/thawing	ČSN EN 1340, Annex D	Concrete products
1.4	Concrete building components and structures		
1.4.1*	Determination of shapes and dimensions, appearance	ČSN 73 0212-5	Building components
1.4.2	Tests of strength and load bearing capacity	ČSN EN 1916, Annex C	Concrete pipes
1.4.3	Tests of strength and load bearing capacity	ČSN EN 1917 except Annex C, D	Concrete manholes
1.4.4	Determination of shear load capacity	ČSN EN 1168+A3, Annex J	Hollow core slabs
1.4.5	Determination of mechanical durability and stability	ČSN EN 1520 ed. 2, annex B	Reinforced components of lightweight concrete
1.4.6	Determination of impact strength	ČSN 73 2035	Building components
1.5	Timber, timber components, timber based and fibre-cement products		
1.5.1*	Static loading tests	ČSN EN 380 ČSN 73 2030, Annex D	Timber structures
1.5.2	Determination of load-bearing capacity and stiffness	ČSN EN 594	Timber structures
1.5.3	Determination of bearing capacity and deformation behaviour	ČSN EN 595	Timber structures
1.5.4	Soft body impact test	ČSN EN 596	Timber structures

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.

Central Laboratory

Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.5.5	Determination of dimensions, water content, local and global bending modulus of elasticity, shear modulus of elasticity, tensile and compressive modulus of elasticity parallel to and perpendicular to the fibres, tensile and compressive strength parallel to and perpendicular to the fibres, bending and shear strength parallel to the fibres	ČSN EN 408+A1	Structural and glued timber
1.5.6	Visual determination of grading characteristics	ČSN 73 2824-1	Coniferous sawn timber for structural elements
1.5.7	Determination of shear strength - shear test of glued joints	ČSN EN 14080, annex D	Glued timber
1.5.8*	Testing of dimensions and geometrical characteristics	ČSN EN 12467+A2, p. 7.2	Fibre-cement flat sheets
1.5.9*	Determination of moisture content	ČSN EN 13183-2	Structural timber
1.5.10	Determination of moisture content	ČSN EN 322	Wood-based panels
1.5.11	Determination of hard body impact resistance	ČSN EN 1128	Cement-bonded particleboards
1.5.12	Determination of strength and deformation characteristics of transversely loaded joints	ČSN EN 1380	Fixtures for timber structures (nails, screws, dowels and bolts)
1.5.13	Determination of tensile, compressive and shear strength	ČSN EN 1075	Fixtures for timber structures (joints made with punched metal plate fasteners)
1.5.14	Determination of bearing capacity and deformation - parallel to the fibres and perpendicular to the fibres	ČSN EN 1381	Fixtures for timber structures (stapled joints)
1.5.15	Determination of withdrawal capacity	ČSN EN 1382	Fixtures for timber structures (screws, nails, staples)
1.5.16	Determination of pull through resistance	ČSN EN 1383	Fixtures for timber structures (screws, nails, staples, bolts)

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.
Central Laboratory
Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.5.17	Determination of strength and deformation	ČSN EN 26891	Fasteners for timber structures
1.5.18	Determination of dimensions	ČSN EN 14592+A1, p. 5	Fasteners for timber structures
1.5.19	Determination of torsional resistance of driving	ČSN EN 15737	Fasteners for timber structures
1.5.20	Determination of modulus of elasticity in bending and of bending strength	ČSN EN 310	Wood based panels
1.5.21	Determination of transverse tensile strength perpendicular to the plane of the board	ČSN EN 319	Wood based panels
1.5.22	Determination of moisture resistance	ČSN EN 321	Wood based panels
1.5.23	Determination of swelling in thickness	ČSN EN 317	Wood based panels
1.7	Glass grids, geotextiles and geotextile-related products		
1.7.1	Determination of tensile strength and elongation	ČSN EN 13496	Glass fibre mesh
1.9	Materials, products and waterproofing systems		
1.9.1	Determination of length, width and straightness	ČSN EN 1848-1	Asphalt sheets
1.9.2	Determination of length, width and straightness	ČSN EN 1848-2	Plastic and rubber sheets
1.9.3	Determination of thickness	ČSN EN 1849-1	Asphalt sheets
1.9.4	Determination of mass per unit area	ČSN EN 1849-1	Asphalt sheets
1.9.5	Determination of thickness	ČSN EN 1849-2	Plastic and rubber sheets
1.9.6	Determination of mass per unit area	ČSN EN 1849-2	Plastic and rubber belts and sheets
1.9.7	Determination of visible defects	ČSN EN 1850-1	Asphalt sheets
1.9.8	Determination of visible defects	ČSN EN 1850-2	Plastic and rubber belts and sheets
1.9.9	Determination of flow resistance	ČSN EN 1110	Asphalt sheets
1.9.10	Determination of tensile properties	ČSN EN 12311-1	Asphalt sheets
1.9.11	Determination of tensile properties	ČSN EN 12311-2	Plastic and rubber belts and sheets
1.9.12*	Determination of tensile adhesion strength	ČSN EN 13596	Waterproofing of concrete bridge decks

**The Appendix is an integral part of

Central Laboratory
Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.9.13	Determination of watertightness	ČSN EN 1928	Bitumen, plastic and rubber belts and sheets
1.9.14	Determination of watertightness	ČSN EN 15820	Bituminous polymer-modified cements
1.9.15	Determination of water vapour permeability	ČSN EN 1931	Bitumen, plastic and rubber belts and sheets
1.9.16	Determination of water vapour transmission properties	ČSN EN ISO 12572	Hygroscopic, nonhygroscopic building materials, sheathed products
1.9.17	Determination of dimensional stability	ČSN EN 1107-1	Asphalt sheets
1.9.18	Determination of dimensional stability	ČSN EN 1107-2	Plastic and rubber belts and sheets
1.9.19	Determination of resistance to long term exposure to elevated temperature	ČSN EN 1296	Bitumen, plastic and rubber belts and sheets
1.9.20	Determination of resistance to blistering	ČSN EN 544 ed. 2, p. 6.4.5	Bitumen shingles
1.9.21	Determination of geometrical properties	ČSN EN 544 ed. 2, p. 6.3	Bitumen shingles
1.9.22	Determination of water absorption	ČSN EN 544 ed. 2, p. 6.4.3	Bitumen shingles
1.9.23	Determination of mass per unit area	ČSN EN 544 ed. 2, cl. 6.2	Bitumen shingles
1.9.24	Determination of resistance to delamination	EOTA TR 004	Cast roof waterproofing assemblies
1.9.25	Determination of resistance to wind load	EOTA TR 005	Cast roof waterproofing assemblies
1.9.26	Determination of watertightness	ČSN EN 14891 ed. 2, method A.7	Liquid-applied water impermeable products used under ceramic tiling
1.9.27	Determination of resistance to artificial ageing by fluorescence UV lamp	EOTA TR 010	Cast roof waterproofing assemblies, etc.
1.9.28	Determination of resistance to artificial ageing by long term exposure to the combination of UV radiation, elevated temperature and water	ČSN EN 1297	Bitumen, plastic and rubber belts and sheets
1.9.29	Determination of resistance to dynamic indentation	EOTA TR 006	Cast roof waterproofing assemblies, etc.
1.9.30	Determination of resistance to static indentation	EOTA TR 007 except p. 5.2.5 c)	Cast roof waterproofing assemblies, etc.
1.9.31	Determination of accelerated ageing by heat	EOTA TR 011	Cast roof waterproofing assemblies, etc.

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
1.9.32	Determination of accelerated ageing by hot water	EOTA TR 012	Cast roof waterproofing assemblies, etc.
1.9.33	Determination of the effects liquid chemicals, including water	ČSN EN 1847	Plastic and rubber belts and sheets
1.9.34	Determination of peel resistance of joints fissility of sheets	ČSN EN 12316-1	Asphalt sheets
1.9.35	Determination of resistance to tearing (nail shank)	ČSN EN 12310-1	Asphalt sheets
1.9.36	Determination of peel resistance of joints	ČSN EN 12316-2	Plastic and rubber belts and sheets
1.9.37	Determination of shear resistance of joints	ČSN EN 12317-2	Plastic and rubber belts and sheets
1.12	Stone, aggregates, inactive concrete admixtures, soils		
1.12.1	Determination of resistance to freezing and thawing	ČSN EN 1367-1	Aggregates
1.12.2	Determination of particle size distribution – sieving analysis	ČSN EN 933-1	Aggregates
1.12.3	Determination of particle shape – Shape index	ČSN EN 933-4	Aggregates
1.12.4	Determination of percentage of crushed and broken surfaces in coarse aggregate particles	ČSN EN 933-5	Aggregates
1.12.5	Determination of resistance to fragmentation	ČSN EN 1097-2	Aggregates
1.12.6	Determination of loose bulk density and voids	ČSN EN 1097-3	Aggregates
1.12.7	Determination of water content by drying in a ventilated oven	ČSN EN 1097-5	Aggregates
1.12.8	Determination of particle density and water absorption	ČSN EN 1097-6	Aggregates
1.12.9	Determination of resistance by magnesium sulphate	ČSN EN 1367-2	Aggregates
1.12.10	Determination of density and water absorption	ČSN EN 14617-1	Agglomerated stone
1.12.11	Determination of flexural strength	ČSN EN 14617-2	Agglomerated stone
1.12.12	Determination of freeze resistance	ČSN EN 14617-5	Agglomerated stone

Sampling:

Ordinal number	Sampling procedure name	Sampling procedure identification ¹	Sampled object
1.V.1	Fresh concrete sampling	ČSN EN 12350-1	Fresh concrete
1.V.2	Hardened concrete sampling	ČSN EN 12504-1, p. 6	Hardened concrete
1.V.3	Sampling of bitumen, plastic and rubber sheets	ČSN EN 13416	Bitumen, plastic and rubber sheets for roof waterproofing
1.V.4	Aggregate sampling	ČSN EN 932-1	Aggregates
1.V.5	Sampling and preparation of testing mortars	ČSN EN 1015-2	Mortars
1.V.6	Sampling of cement and ash	ČSN EN 196-7	Cement and fly ash

¹ If the document identifying the sampling procedure is dated, only these specific procedures are used. If the document identifying the sampling procedure is not dated, the latest edition of the specified procedure is used (including any changes).

2. Testing Laboratory in České Budějovice

Tests:

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
2.2	Concrete, admixtures and fibres for concrete		
2.2.1*	Determination of consistency by slump test	ČSN EN 12350-2	Fresh concrete
2.2.2*	Determination of consistency by flow table test	ČSN EN 12350-5	Fresh concrete
2.2.3*	Determination of mass per unit volume	ČSN EN 12350-6	Fresh concrete
2.2.4*	Determination of air content - pressure methods	ČSN EN 12350-7, p. 6	Fresh concrete
2.2.5	Determination of tensile strength	ČSN 73 1318	Hardened concrete
2.2.6	Determination of concrete frost resistance	ČSN 73 1322	Hardened concrete
2.2.7	Determination of resistance to water and chemical de-icing agents	ČSN 73 1326, methods A, C	Hardened concrete
2.2.8*	Determination of the shape and dimensions of specimens	ČSN EN 12390-1	Hardened concrete
2.2.9*	Determination of compressive strength, including the manufacture and treatment of test specimens	ČSN EN 12390-2 ČSN EN 12390-3 ČSN EN 12504-1, except p. 6	Hardened concrete
2.2.10	Determination of compressive strength of test specimens	ČSN EN 12390-3	Hardened concrete
2.2.11	Determination of flexural strength of test specimens	ČSN EN 12390-5	Hardened concrete
2.2.12	Determination of the indirect tensile strength of test specimens	ČSN EN 12390-6	Hardened concrete
2.2.13	Determination of mass per unit volume	ČSN EN 12390-7	Hardened concrete
2.2.14	Determination of depth of penetration of water under pressure	ČSN EN 12390-8	Hardened concrete

Central Laboratory
Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
2.2.15	Determination of static modulus of elasticity in compression	ČSN ISO 1920-10	Hardened concrete
2.2.16*	Determination of compressive strength	ČSN EN 12504-1, except p. 6	Hardened concrete
2.2.17*	Determination of rebound number by hardness drop tester	ČSN EN 12504-2	Hardened concrete
2.2.18*	Determination of compressive strength by hardness testing methods (Schmidt N. L.)	ČSN 73 1373	Hardened concrete
2.2.19*	Determination of compressive strength by hardness testing methods (Schmidt N. L.)	ČSN 73 2011	Hardened concrete
2.2.20	Determination of setting time	ČSN EN 480-2	Concrete and mortar additives
2.2.21	Determination of bleeding of concrete	ČSN EN 480-4	Concrete and mortar additives
2.2.22	Determination of capillary absorption	ČSN EN 480-5	Concrete and mortar additives
2.2.23	Determination of solids content	ČSN EN 480-8	Concrete and mortar additives
2.2.24*	Determination of adhesion, tensile strength and impermeability	ČSN 73 6242, annex B	Bridges - surface layers
2.2.25*	Determination of pavement surface macrotexture depth using a volumetric patch technique	ČSN EN 13036-1	Bridges – surfaces
2.2.26*	Determination of irregularity of pavement courses	ČSN 73 6175, p. 8	Bridges – surfaces
2.2.27*	Determination of impermeability by measuring electrical resistance	ČSN 73 6242, Annex D	Bridges - surface layers
2.2.28	Determination of impermeability by high electrical voltage - spark test	ČSN 73 6242, Annex E	Bridges - surface layers

5.32.1	Determination of tensile strength under normal conditions and after artificial ageing	ETAG 004, p. 5.6.7.1	Mesh ETICS
5.33	Loading tests of bridges, building structure and floors		
5.33.1*	Static loading tests	ČSN 73 2030, Annexes A, B, C	Building structures and their parts
5.34	Masonry, hardware, partition walls, ceilings, floors		
5.34.1*	Determination of flexural resistance and shear resistance	ČSN EN 846-9 ed. 2	Ancillary components for masonry, lintels
5.35	Masonry units, permanent formwork, ceilings elements, burnt and concrete roofing		
5.35.1	Determination of dimensions	ČSN EN 772-16	Masonry units
5.35.2	Determination of flexural strength	ČSN 72 2605, cl. 24 to 28	Masonry materials, burnt roofing
5.35.3	Determination of resistance to frost	ČSN 72 2601, Annex A	Brick products
5.35.4	Testing of dimensional tolerances and mass	ČSN EN 491, p. 5.2 - 5.5	Concrete roofing tiles
5.35.5	Determination of cold water absorption	ČSN EN 772-21	Burnt and calcium silicate masonry units
5.35.6	Determination of mass per unit volume	ČSN EN 772-13	Masonry units
5.35.7	Determination of compressive strength	ČSN EN 772-1+A1	Masonry units
5.35.8	Determination of water permeability	ČSN EN 491, p. 5.7	Concrete roofing tiles
5.35.9	Determination of mechanical resistance (transverse load bearing capacity)	ČSN EN 491, p. 5.6	Concrete roofing tiles
5.35.10	Test of freeze resistance	ČSN EN 491, p. 5.8	Concrete roofing tiles

¹ Asterisk at the ordinal number identifies the tests, which the Laboratory is qualified to carry out outside the permanent Laboratory premises.

² If the document identifying the test procedure is dated, only these specific procedures are used. If the document identifying the test procedure is not dated, the latest editions of the specified procedure are used (including any changes).

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.
Central Laboratory
Nemanická 441, 370 10 České Budějovice

Sampling:

Ordinal number	Sampling procedure name	Sampling procedure identification ¹	Sampled object
5.V.1	Fresh concrete sampling	ČSN EN 12350-1	Fresh concrete
5.V.2	Hardened concrete sampling	ČSN EN 12504-1, p. 6	Hardened concrete

¹ If the document identifying the sampling procedure is dated, only these specific procedures are used. If the document identifying the sampling procedure is not dated, the latest edition of the specified procedure is used (including any changes).

6. Testing Laboratory in Brno

Tests:

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested object
6.2	Concrete, admixtures and fibres for concrete		
6.2.1*	Determination of consistency by slump test	ČSN EN 12350-2	Fresh concrete
6.2.2	Determination of degree of compactibility	ČSN EN 12350-4	Fresh concrete
6.2.3*	Determination of consistency by flow table test	ČSN EN 12350-5	Fresh concrete
6.2.4*	Determination of mass per unit volume	ČSN EN 12350-6	Fresh concrete
6.2.5*	Determination of air content - pressure methods	ČSN EN 12350-7, p. 6	Fresh concrete
6.2.6	Determination of suitability - initial assessment, humic substances	ČSN EN 1008, p. 6.1.1, 6.1.2	Concrete mixing water
6.2.7	Determination of tensile strength	ČSN 73 1318	Hardened concrete
6.2.8	Determination of volume changes	ČSN 73 1320	Hardened concrete
6.2.9	Determination of resistance to frost	ČSN 73 1322	Hardened concrete
6.2.10	Determination of resistance to water and chemical de-icing agents	ČSN 73 1326, methods A, C	Hardened concrete
6.2.11	Determination of modulus of elasticity	ČSN 73 6174	Hardened concrete
6.2.12	Testing of shapes and dimensions	ČSN EN 12390-1	Hardened concrete
6.2.13	Determination of compressive strength, including the manufacture and treatment of test specimens	ČSN EN 12390-2 ČSN EN 12390-3 ČSN EN 12504-1, except p. 6	Hardened concrete
6.2.14	Determination of compressive strength of test specimens	ČSN EN 12390-3	Hardened concrete
6.2.15	Determination of flexural strength of test specimens	ČSN EN 12390-5	Hardened concrete

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.
Central Laboratory

6.35.37	Determination of compressive strength	ČSN EN 772-1+A1	Masonry units
6.35.38	Determination of water permeability	ČSN EN 491, p. 5.7	Concrete roofing tiles
6.35.39	Determination of mechanical resistance (transverse load bearing capacity)	ČSN EN 491, p. 5.6	Concrete roofing tiles
6.35.40	Frost resistance test	ČSN EN 491, p. 5.8	Concrete roof tiles
6.35.41	Determination of moisture expansion	ČSN EN 772-19	Masonry units
6.35.42	Determination of susceptibility to efflorescence	ČSN 72 2642, p. 10	Brick products
6.35.43	Determination of the presence of lime nodules	ČSN 72 2642, p. 9	Brick products
6.35.44	Determination of moisture expansion	ČSN 72 2642, p. 8	Brick products
6.35.45	Determination of resistance to concentric load	ČSN EN 15037-2+A1, p. 5.2.1	Beam-and-block floor systems
6.35.46	Determination of weight	ČSN 72 2642, p. 6	Brick products
6.35.47	Determination of water absorption at boiling	ČSN 72 2642, p. 7	Brick products
6.35.48	Determination of water absorption and initial water absorption	ČSN EN 771-1+A1, Annex C	Masonry units

¹ Asterisk at the ordinal number identifies the tests, which the Laboratory is qualified to carry out outside the permanent Laboratory premises.

² If the document identifying the test procedure is dated, only these specific procedures are used. If the document identifying the test procedure is not dated, the latest editions of the specified procedure are used (including any changes).

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.
Central Laboratory
Nemanická 441, 370 10 České Budějovice

Sampling:

Ordinal number	Sampling procedure name	Sampling procedure identification ¹	Sampled object
6.V.1	Fresh concrete sampling	ČSN EN 12350-1	Fresh concrete
6.V.2	Hardened concrete sampling	ČSN EN 12504-1, p. 6	Hardened concrete
6.V.3	Aggregate sampling	ČSN EN 932-1	Aggregates

¹ If the document identifying the sampling procedure is dated, only these specific procedures are used. If the document identifying the sampling procedure is not dated, the latest edition of the specified procedure is used (including any changes).

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

7. Testing Laboratory in Ostrava

Tests:

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested item
7.2	Concrete, admixtures and fibres for concrete		
7.2.1*	Determination of consistency by slump test	ČSN EN 12350-2	Fresh concrete
7.2.2*	Determination of consistency by VeBe test	ČSN EN 12350-3	Fresh concrete
7.2.3*	Determination of mass per unit volume	ČSN EN 12350-6	Fresh concrete
7.2.4*	Determination of air content - pressure methods	ČSN EN 12350-7, p. 6	Fresh concrete
7.2.5	Determination of suitability - initial assessment, humic substances	ČSN EN 1008, p. 6.1.1, 6.1.2	Mixing water for concrete
7.2.6	Determination of resistance to frost	ČSN 73 1322	Hardened concrete
7.2.7	Determination of the shape and dimensions of specimens	ČSN EN 12390-1	Hardened concrete
7.2.8	Determination of compressive strength of test specimens	ČSN EN 12390-3	Hardened concrete
7.2.9	Determination of flexural strength of test specimens	ČSN EN 12390-5	Hardened concrete
7.2.10	Determination of the indirect tensile strength of test specimens	ČSN EN 12390-6	Hardened concrete
7.2.11	Determination of density of hardened concrete	ČSN EN 12390-7	Hardened concrete
7.2.12	Determination of depth of penetration of water under pressure	ČSN EN 12390-8	Hardened concrete
7.2.13*	Determination of hardness by Schmidt rebound tester	ČSN 73 1370	Hardened concrete
7.2.14*	Determination of compressive strength by hardness testing methods (Schmidt N. L.)	ČSN 73 1373	Hardened concrete
7.2.15*	Determination of compressive strength by hardness testing methods (Schmidt N. L.)	ČSN 73 2011	Hardened concrete
7.2.16	Determination of capillary absorption	ČSN EN 480-5	Concrete and mortar additives

**The Appendix is an integral part of
Certificate of Accreditation No. 292/2022 of 15/06/2022**

Accredited entity according to ČSN EN ISO/IEC 17025:2018:

Technický a zkušební ústav stavební Praha, s.p.
Central Laboratory
Nemanická 441, 370 10 České Budějovice

Ordinal number ¹	Test procedure/method name	Test procedure/method identification ²	Tested item
7.2.17	Determination of fibre content	ČSN EN 14721+A1	Fresh and hardened concrete with metal and polymer fibres
7.2.18	Determination of general suitability of fibres for use in concrete	ČSN EN 14845-1	Concrete with metallic and polymeric fibers
7.2.19	Determination of the effect of fibres on the residual flexural strength	ČSN EN 14845-2	Concrete with metallic and polymeric fibers
7.2.20	Determination of the effect of fibres on concrete	ČSN EN 1766 ed. 2, cl. 4, 5, 6, 8	Concrete with metallic and polymeric fibers
7.2.21	Determination of flexural tensile strength - limit of proportionality, residual strength	ČSN EN 14651+A1	Metallic fibre-reinforced concrete
7.2.22	Determination of dry bulk density	ČSN EN 678	Autoclaved concrete
7.2.23	Determination of compression strength, flexural strength and concentric compressive strength	ČSN EN 679	Aerated concrete
7.2.24	Determination of flexural strength during drying	ČSN EN 1351, cl. 5 to 7	Autoclaved aerated concrete
7.2.25	Determination of moisture content	ČSN EN 1353, cl. 5 to 7	Autoclaved aerated concrete
7.2.26*	Determination of adhesion, tensile strength and impermeability	ČSN 73 6242, annex B	Bridges - surface layers
7.3	Small concrete products		
7.3.1	Determination of resistance to freezing/thawing	ČSN EN 1338, Annex D	Concrete products
7.3.2	Determination of resistance to freezing/thawing	ČSN EN 1339, Annex D	Concrete products
7.3.3	Determination of resistance to freezing/thawing	ČSN EN 1340, Annex D	Concrete products
7.3.4	Determination of abrasiveness - Böhme	ČSN EN 1340, Annex H	Concrete products
7.3.5	Determination of dimensions	ČSN EN 13748-1, p. 5.2, 5.3, 5.4	Concrete products
7.3.6	Determination of flexural strength and fracture load	ČSN EN 13748-1, p. 5.5	Concrete products
